

AIR QUALITY

Aero TRACKERS

Breath Better, Grow Healthier
A Somaiya Citizen Science Initiative

12 Jan 2026 | 2:00 PM to 5:00PM
Somaiya Vidyavihar University

Why join?

This workshop gives you a hands-on exposure to real-world air quality monitoring, research thinking, and citizen science, with a chance to contribute data that actually shapes community awareness and sustainability conversations.

Dive into a hands-on workshop by

- **Dr Nilesh Wagh**, Associate Professor and Head of Department, Environmental Sciences
- **Dr. Ayesha Hakim**, Assistant Professor, Dept of Electronics Engineering, K J Somaiya School of Engineering

What you'll do

- Learn **tools & techniques** for air quality monitoring across region/community
- Learn to **frame hypothesis** and **research questions**
- Gain skill sets in **data collection** tools and **data interpretation**

What happens after

Stick around for the year-long challenge where you'll:

- Join us on a **year-long journey** for air health monitoring
- Attend workshop series on **GIS based mapping and monitoring systems**
- Showcase your data at the **Somaiya Sustainability Dialogue 2027**
- Lead **community interaction** in and around your institutes about air quality and health

Who can participate

- The workshop is open to **undergraduates** and **postgraduates**.

Every participant will receive a **Certificate of Participation**. Students choosing a longer association through active involvement will earn an **'Initiation Badge'** as part of the ongoing Citizen Science Programme.
